"Because it makes me feel free, and it vibes with my personality. I found myself in the drawings."

Introduction

I have been planning to add diversity and add articles from people from different stances and viewpoints in life. This article is from my friend Bhumi. She has been drawing as a passion from a long time and I would like to share her's view towards it.!

Hi, I am Bhumi.

I do drawings because it makes me feel free, and it vibes with my personality. I found myself in the drawings. I didn't have better art supplies but I do my best with what I have. I have started to draw after looking at my sister's drawings. She had a drawing habit too. I researched art and I am fond of cultural drawings and I have been inspired by the Kumari (Newar cultural goddess).

Grade 8

I have been drawing since small. After 8 I stayed in the hostel where I found my some friends drawing but wasn't able to continue due to hostel life. I did get a picture of me in my school magazine. On the outing when I went home I did madala arts. I was fond of it

too. I then searched about colors I bought fevicolor and did paint drawings in the back of my bag haha. I use painting colors.

Grade 9

In grade 9 I didn't draw much. I stand out with my art in grade 9 where I compete with my mandala drawing of kumari. I became second. Since then I have been confident of the fact that my art does hold a value to the world.

Grade 10

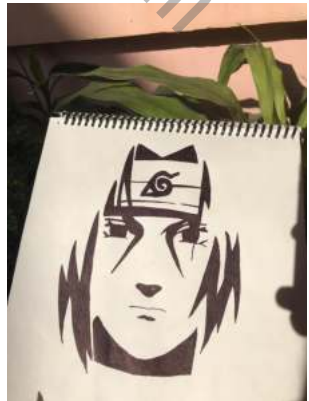

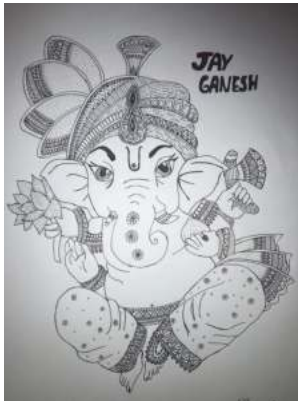

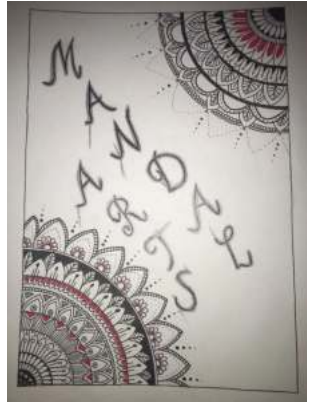

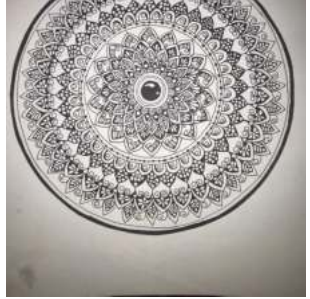

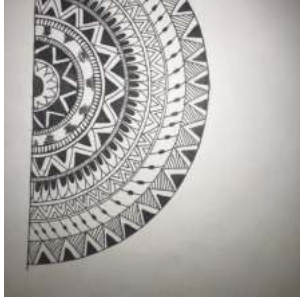

Again I started drawing from grade 10. I did have an interest in Crafts too. Due to my S.E.E., I didn't have time to perform. But I did draw for the annual After grade 10 I did practice drawing with coffee. And had been drawing since then.

Present

Nowadays I draw with normal drawing pencils. I did take references from Google and books. I did drawings regularly and I have been drawing consistently in grade 11.
