Introduction

I was looking reels when I knew about the upcoming free art exhibition in Takpa Gallery in Lazimpat. I was named as "THE NEXT 2024". As I was in my winter vacation I think about going there with my friends tanuj and shrawan. I got the message from shrawan and go to know he was free on saturday and was asking if there is anything we can attend. Luckily same day was the opening day of takpa galley. I told him and called tanuj where tanuj called off the meet in the late moment and only me and shrawan were there.

Art

I am found myself as a art enthusiast. The exhibition there were lovely. The art expressed so much more than we could have though. The other people that were there were also too much attracted and driven to the arts. Shrawan and I together bought and book mark and talked with the organizers too. As we were in hurry as it started from 4:00 pm on the first day it will happen for around 3 weeks. I found some arts really wonderfull there.

Final Words

I had a wonderful experience with my friend. The takpa gallery holds wonderful arts. If you are looking for a good hangout chat with friends or loved one. Do visit takpa as the exhibition will end soon!.

"Inner Visage"

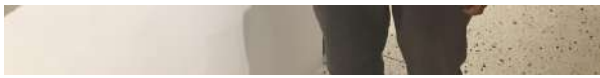

This work explores the dynamic interplay of inner archetypes—the budding inner child and the challenged inner adult. Positioned at the center, the inner child is in a state of growth, while the adult grapples with containment, aiming for harmony and integration. A golden line serves as a symbolic boundary, nurturing positive growth in this internal dialogue.
